iPhone Hybrid

version :1.0.0

iphone hybrid hw

COREMODULE

PhoneGap

PhoneGap is an HTML5 app platform that allows you to author native applications with web technologies and get access to APIs and app stores. PhoneGap leverages web technologies developers already know best... HTML and JavaScript.

SBJSON

A strict JSON parser and generator for Objective-C. It adds categories to existing Objective-C objects for a super-simple interface. More flexible APIs are also provided for added control.

EXTERNALMODULE

ConfigurationReader

Configuration reader library to read and write XML configuration created by phresco

OCUnitReportGenerator

OCUnit report generator Library that generates Junit style report from OCUnit logger files. These sources needs to be added as sources for compilation available at ThirdParty/OCUnitReportLogger
